

Lip Lip Hooray

This new formula brings you a semi-matte texture that's hard to resist!

WELCOME MATTE

Ever had a lipstick which looks amazing on your friend, only to find out that it doesn't make your pout pop? That's because you both have different lip textures and body temperatures, which can affect the lipstick finish. Matte formulas may look great but they don't help dry lips. Glossy ones on the other hand don't last long.

Your best pick? The new Mary Kay Gel Semi-Matte Lipstick. Its semi-matte formula isn't too moist or too dry, just ideal. Most of all, it delivers really vivid results!

BOLDLY YOURS

See these ultra-fine colours? Thanks to Mary Kay's Advanced Cushion Matrix Technology, they'll stay on your kissers for hours on end! No worries about chapping them up, too – the lightweight gel will glide over with nourishing sunflower oil and jojoba esters.

Just ready your pucker for perfection. Available in eight shades (Bashful You, Rich Truffle, Mauve Moment, Powerful Pink, Always Apricot, Poppy Please, Crushed Berry and Midnight Red), you'll surely find a hot hue to match your skin tone and all your OOTDs.

THREE LIPPIE HACKS EVERY CLEO GIRL SHOULD KNOW!

1 To create a pretty lip stain, rub lipstick on your ring finger and gently apply onto your lips using light dabbing motions. Or, use a fluffy eyeshadow brush to distribute colour.

2 Reattach a broken lipstick bullet by heating the end with a lighter. Once slightly melted, place it back on the base of the container to fuse the two pieces together.

3 Besides a toothbrush, you can use a clean mascara wand to gently buff away dry skin for smoother application.
